Functional Tips for Print Envoy

-By Harrison Brazelton harrison.brazelton@nextw.com

This month's tip for getting more from your Print Envoy implementation!

Print Envoy: Template & Printer Selection Rule Updates

In this month's edition of the Print Envoy newsletter, we will be discussing our new functionality that allows users to filter Template Selection Rules on Print Handlers, as well as allowing you to dynamically choose Printer Selection Rules based on the 'Template Rule Name' that was chosen for a label. I will provide examples with how users can utilize this functionality below.

Template Selection Rule Filtering

Navigate to DSI Print Envoy – Print Handling – Template Selection Rules.

← 🚍 🗟 Save 🕂 New 🗎 Delete	Options ,0					8	0	0	C	d

P Filter	Standard view ~ Template Selection I	Rules								
Print Handler All	Rule Name ArrivalJournal_Post	Label Template Name Placeholder2	Priority Lab	el Qty or Field Providing Qty	Override Printer Printer01 V Template Prefix					
ArrivalJournal_Post 0	Rule Fields								^	9
ArrivalJournal_PrintLinesButt Placeholder ArrivalJournal_PrintLinesButton 0	+ New Delete C C Field ID PrintHandlerName	Value ArrivalJournal_Post	Description							I
Count rule test CountJournal_PrintLinesButton 10										
Count rule 02 Count/ournal_PrintLines8utton Count/ournal_PrintLines8utton 60										
CountJournal_Post Placeholder CountJournal_Post 0										
Del DE constational MANDO										

You will notice the new 'Print Handler' filter highlighted above in the screenshot.

	Print Handler
	All
1	All
	ArrivalJournal_Post
	ArrivalJournal_PrintLinesButton
	CountJournal_Post
	CountJournal_PrintLinesButton
	DSI_PE_Canceled_work_WMDP
	InventoryLabelPrint
_	LocationLabelPrint
	ProdTableListPage_PrintButton
	ProdTableListPage_Release
	ProductionFloorExecution
	ProductionFloorExecutionButton
	ProductionFloorExecutionReportProgress
	SalesTable_PrintLinesButton
_	WHSContainerTable_CloseContainerProfileId
	WHSContainerTable_PrintPalletLabelsButton
	WHSLicensePlate_PrintButton
	WHSLicensePlate_WMDP
-	WHSLicensePlateLabel_Create
4	Wittership and the Defendation is at the left state

Once you click on the filter, it will list each Print Handler. Select a record from the drop-down to see all relevant 'Template Selection Rules' relating to the chosen Print Handler.

Print Envoy Tips Issue #19

The list will display all relevant 'Template Selection Rules' that could be used by the specified Print Handler, which include rules directly relating to a Print Handler via the 'PrintHandlerName' rule field or a default/'catch-all' rule that could still be used by the specified Print Handler. These records are displayed in 'priority' order, you can see in the screenshot above that the first rule, 'Count Rule', has a priority of 10, therefore it is displayed above the 'Count rule 02' record with a priority of 60.

This is very useful for users who have multiple template selection rules as the list can grow very large in some cases, making it difficult to find or modify specific template rules.

Select Printer Selection Rules Based on the Label Template

There are many cases where a label needs to be sent to a specific printer based on criteria already defined by the 'Template Selection Rule'. With this new feature, if your criteria are defined on the 'Template Selection Rule', all you would need is one rule field on your Printer Selection Rule tying back to the template you are using. I have provided an example below.

← 😑 🗟 Save 🕂 New 🛍 Delete	Options 🔎							
✓ Filter	Standard view ~ Printer Selection Rules							
Catchall Printer03 99	Rule Name TemplateNameTest3	Printer ID Printer04	Priority ~ 0	0				
CountButton Printer04	Rule Fields							
0 TemplateNameTect	C Field ID TempleteBullebla	Value Count rule	Descri	ption				
Printer02 0	lemplaterulena	Count rule						
TemplateNameTest3 Printer04 0								
Test05								
0								

Navigate to DSI Print Envoy – Print Handling – Printer Selection Rules.

Create a new Printer Selection Rule or edit an existing one. Add a 'Rule Field' with the 'TemplateRuleName' Field Id. Set the value to whatever template rule name you want to use.

It is still possible to add multiple 'Rule Fields' and increase the selection criteria, if necessary, but in this example, I am just showing how a user can easily tie a template to a printer using only one 'Rule Field'.

Standard view 🗸										
Template Selection Rules										
Count n	ule		Label Templa test	te Name	Priority	10	Label Qty or Field Providing Qty	Override Printer Image: Constraint of the second		
Rule Fields										
+ New 📋 Delete										
\bigcirc	C	Field ID	Ŷ	Value		Descrip	tion			
\bigcirc		PrintHandlerName		CountJournal_PrintLines	sButton					

The 'Rule Name' field highlighted above on the 'Template Selection Rule' corresponds to the 'TemplateRuleName' rule field value.

Thanks for making it this far, and I hope that you will be able to find value in these new features! We are constantly striving to make user-friendly improvements and increase the value of Print Envoy as a whole. Please reach out to me at <u>harrison.brazelton@nextw.com</u> if you have any questions or concerns regarding these features, or if you have any ideas of your own that you believe would be beneficial to the functionality or value of Print Envoy.
